REVISED GUIDELINES ON MEMBERS OF PARLIAMENT LOCAL AREA DEVELOPMENT SCHEME (MPLADS) — 2023

Effective from 1st April, 2023 | Integrated with e-SAKSHI & TSA JIT Protocol

1. Background & Scope of the Scheme

The Members of Parliament Local Area Development Scheme (MPLADS) was instituted in December 1993 to enable Members of Parliament (MPs) to recommend works of developmental nature for the creation of durable community assets based on locally felt needs. The annual financial allocation under the scheme is Rs. 5.00 Crore per Member of Parliament, released as a statutory entitlement.

2. Key Reforms Introduced in the 2023 Revision

Key Dimension	Prior Framework (2016)	Revised Guidelines 2023
Fund Authorization	Two tranches of Rs 2.50 Cr upon UC submission	Single annual authorization of Rs 5.00 Cr via eSAKSHI
Fund Flow System	Commercial bank account parking	Treasury Single Account (TSA) Just-In-Time RBI release
Recommendation Portal	Manual physical paper file movements	100% paperless e-SAKSHI digital submission
Sanction Time limit	No binding SLA (often > 120 days)	Strict 45-day statutory SLA for District Authority
Asset Durability & Quota	15% SC, 7.5% ST target	Mandatory 15% SC, 7.5% ST with automated algorithmic geo-audit

3. Permissible and Prohibited Works

Works permissible under MPLADS must result in the creation of durable public assets for broad community benefit. Permissible categories include: drinking water supply, primary education infrastructure, community health sub-centres, rural roads, renewable energy installations, sanitation facilities, and public digital libraries. Explicitly prohibited works include: commercial ventures, places of religious worship, private residential properties, and recurring administrative or revenue expenditures.

4. Implementation Agency & Statutory Audits

The District Authority (District Collector/District Magistrate) remains the nodal executive authority responsible for overall coordination. Technical sanctions must conform strictly to State Schedule of Rates (SOR/DSR). All works must be inspected, geo-tagged, and time-stamped at 3 milestones: Foundation, 50% Completion, and Final Handover. Third-party continuous algorithmic integrity checks are monitored by the PRAHAR sentinel network.
